## 1. MAYORS FOREWORD

Local government is judged by its ability to deliver services, promote socio-economic development and govern effectively. As Mayor of Musina Local Municipality, I am aware of the numerous responsibilities bestowed on the Council to bring about fundamental changes to our municipality that will have a positive effect on the livelihoods of all our people.

Local government is the sphere of government closest to its constituency, thus the pulse and beat of our people in response to the performance or lack thereof of the local sphere of government or any other sphere is felt almost immediately. Our government promotes accountability to our communities, interested and affected parties, further both the Municipal Systems Act and Municipal Finance Management Act entrenches a responsibility to annually account on the performance of the municipality.

It is against this background that Musina Local Municipality has crafted its vision to be the vibrant, viable and sustainable gateway city to the rest of Africa. Hence, we define a city as a relatively large and permanent settlement with complex systems for sanitation, land usage, housing, and transportation. The concentration of development greatly facilitates interaction between people and businesses, benefiting both parties in the process and improving the quality of lives of the people of Musina, Vhembe District, Limpopo and South Africa.

Musina Local Municipality has crafted its service delivery and budget implementation plan (SDBIP) for 2015-2016 as an enabling planning and management instrument to facilitate implementation of the 2015/16 council approved IDP and Budget. The SDBIP for the 2015/16 financial year has been developed taking into account compliance requirements set for local government performance management. The SDBIP is thus a critical tool for management, implementation and monitoring of individual, departmental and organisational performance that will assist the political office bearers and management in delivering services to the community and exercising oversight on implementation of key council plans and strategies.

The purpose of the SDBIP is to monitor the execution of the budget and achievement of the strategic objectives set by Council. It enables the Municipal Manager to monitor the performance of senior managers, the Mayor to monitor the performance of the Municipal Manager, and for the community to monitor the performance of the municipality. We remain committed to the realization of the five National Key Performance Areas of municipalities, being the following:

- Good Governance and Public Participation
- Municipal Transformation and Organizational Development
- Basic Infrastructure and Service Delivery
- Local Economic Development
- Municipal Financial Viability and Management

We are ready to implement and give account of progress made in giving meaningful life to the content of this SDBIP, and to fulfil our declared commitment to better the lives of the people. What is needed now is the support and enthusiasm of the people of Musina to own this SDBIP and to turn its objectives into reality, let's get down to work hands on deck back to basics a people centred and service orientated local government.

A handwritten signature in black ink, reading 'M.E. Mhlope', is written over a horizontal line.

**Cllr. Ethel Mhloti Ramoyada**  
**Mayor, Musina Local Municipality**

## **2. INTRODUCTION AND BACKGROUND**

The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Municipal Finance Management Act (MFMA) section 69 (3) (b). Circular 13 of the National Treasury stipulates that, “the SDBIP gives effect to the Integrated Development Plan (IDP) and the budget of the municipality and will be possible if the IDP and the budget are fully aligned with each other, as required by the MFMA.”

The budget gives effect to the strategic priorities of the municipality it is important to supplement the budget and the IDP with a management and implementation plan. The SDBIP serves as the commitment by the municipality to realise the municipal objectives, the SDBIP projects planned level and standard of performance and specific achievements to be accounted upon implementation. This is expressed in order to ensure that desired outcomes over the long term are achieved and are implemented by the administration over the next 12 months.

The Municipal Finance Management Act (MFMA) no 56 of 2003, defines the Service Delivery Budget Implementation Plan as a detailed plan approved by the Mayor of the municipality for implementing the municipality’s delivery of municipal services and its annual budget vote including service delivery targets and performance indicators for each quarter

### **2.1 PURPOSE**

The document presents the 2015/2016 Service Delivery and Budget Implementation Plan of the municipality drafted in compliance with the requirements of the MFMA. The performance targets set in this document lay basis for the performance contracts of all Head of Departmental Heads and inform work plans and reportable matters for the department. It enables the Council and the Municipal Manager to monitor the performance of the Municipal Manager and Managers directly Accountable to the Municipal Manager; and the community to monitor the performance of the municipality

### **2.2 LEGAL REQUIREMENTS CONSIDERED WITH THE DEVELOPMENT/DESIGN OF THE SDBIP**

Section 53 1(c) (ii) of the MFMA states that the Mayor must ensure that the municipality’s SDBIP is approved within 28 days after approval of the budget.

Section 69(3) of the MFMA states that the Accounting Officer must no later than 14 Days after the approval of the Budget submit the draft SDBIP and Performance Agreements for the Municipal Manager and all Senior Managers to the Mayor.

Sec 53 3(b) also states that the SDBIP’s must be made public no later than 14 days after its approval by Council and that the Performance agreements of the Municipal Manager, Senior Managers and any other categories of officials as may be prescribed, should be made public no later than 14 days after the approval of the SDBIP.

### **2.3 REPORTING ON SDBIP**

This section covers reporting on the SDBIP as a way of linking the SDBIP with the oversight and monitoring operations of the Municipal administration. Various reporting requirements are outlined in the MFMA. Both the Mayor and the Accounting Officer have clear roles to play in preparing and presenting these reports.

The SDBIP provides an excellent basis for generating reports for which MFMA requires. The reports then allow the Municipality to monitor the implementation of service delivery programs and initiatives across the municipality.

### **2.4 QUARTERLY REPORTING**

Section 52 (d) of the MFMA compels the mayor to submit a report to the municipal council on the implementation of the budget and the financial state of affairs of the municipality within 30 days of the end of each quarter. The quarterly performance projections captured in the SDBIP form the basis for the mayor's quarterly report.

### **2.5 MID-YEAR REPORTING**

Section 72 (1) (a) of the MFMA outlines the requirements for mid-year reporting. The accounting officer is required by the 25<sup>th</sup> January of each year to assess the performance of the municipality during the first half of the year taking into account:

- (i) the monthly statements referred to in section 71 of the first half of the year
- (ii) the municipalities service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the service delivery and budget implementation plan;
- (iii) the past year's annual report, and progress on resolving problems identified in the annual report; and
- (iv) the performance of every municipal entity under the sole or shared control of the municipality, taking into account reports in terms of section 88 from any such entities.

Based on the outcomes of the mid-year budget and performance assessment report, an adjustments budget may be tabled if actual revenue or expenditure amounts are materially different from the projections contained in the budget or the SDBIP. The SDBIP is also a living document and may be modified based on the mid-year performance review. Thus the SDBIP remains a kind of contract that holds the Municipality accountable to the community.

### **2.6 ANNUAL REPORTING**

Section 46 (1) of Municipal Systems Act stipulates that a municipality must prepare for each financial year a performance report reflecting

- (a) the municipality's, and any service provider's, performance during that financial year, also in comparison with targets of and with performance in the previous financial year;
- (b) the development and service delivery priorities and the performance targets set by the municipality for the following financial year; and
- (c) measures that were or are to be taken to improve performance.

Sec 46 (2) further states that an annual performance report must form part of the municipality's annual report in terms of Chapter 12 of the MFMA.

### **3. LEGISLATION**

The Municipal Finance Management Act (MFMA) defines a Service Delivery and Budget Implementation Plan (SDBIP) as: a detailed plan approved by the mayor of a municipality in terms of section 53 (1) (c) (ii) for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate-

(a) Projections for each month of-

(i) Revenue to be collected, by source; and

(ii) Operational and capital expenditure, by vote;

(b) Service delivery targets and performance indicators for each quarter

Section 53 of the MFMA stipulates that the Mayor should approve the SDBIP within 28 days after the approval of the budget. The Mayor must also ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators as set out in the SDBIP are made public within 14 days after their approval.

The following National Treasury prescriptions, in terms of MFMA Circular 13, are applicable to the Musina Local Municipality:

1. Monthly projections of revenue to be collected by source

2. Monthly projections of expenditure (operating and capital) and revenue for each vote<sup>1</sup> \*

3. Quarterly projections of service delivery targets and performance indicators for each vote

4. Ward information for expenditure and service delivery

5. Detailed capital works plan broken down by ward over three years

The MFMA S54 (1) (c) states that the Mayor must, if necessary make any revisions to the service delivery and budget implementation plan, provided that revisions to the service delivery targets and performance indicators in the plan may only be made with the approval of the council following approval of any adjustment budget. Circular 13 also indicates the following in this regard: ".....the top-layer of the SDBIP and its targets cannot be revised without notifying the council, and if there is to be changes in service delivery targets and performance indicators, this must be with the approval of the council, following approval of an adjustments budget (section 54(1)(c) of MFMA). This council approval is necessary to ensure that the mayor or municipal manager do not revise service delivery targets downwards in the event where there is poor performance".

### **4. METHODOLOGY AND CONTENT**

The development of the SDBIP was influenced by the Priorities, Objectives and Strategies contained in the IDP ensuring progress towards the achievement thereof. The SDBIP of the Musina Local Municipality is aligned to the Key Performance Areas (KPAs) as prescribed by the Performance Management Guide for Municipalities of 2001, with the addition of Spatial Rationale as another KPA to be focused upon.

In this plan, the IDP objectives are quantified and related into high level service delivery and key performance indicators. Indicators are assigned quarterly targets and responsibilities to monitor performance.

The SDBIP is described as a layered plan. The top layer deals with consolidated service delivery targets and time frames as indicated on this plan. The second layer of the SDBIP, that need not be made public, will deal with the breakdown of more details of outputs per department and will be contained in the departmental SDBIPs.

The development of the document sought to integrate and link IDP objectives, programmes and projects with the municipal budget and provide details of the deliverables thereof including targets and timeframes. The drafting of the budget, IDP review and SDBIP for the 2015/16 financial year happened concurrently through the IDP/ Budget Review process.

## 8. SERVICE DELIVERY AND PERFORMANCE INDICATORS

The high level non-financial measurable performance objectives in the form of service delivery targets and other performance indicators form part of this section of the SDBIP. These indicators and targets will be cascaded to departmental scorecards, which will be used for internal monitoring of the organisation and relevant individuals. The planning details for each indicator are also included in this part of the adjustment SDBIP.

## 9. CONCLUSION

The SDBIP is a vital monitoring tool for the mayor and council to monitor in-year performance of the municipality. The SDBIP gives meaning to the budget and the IDP and will inform both in-year reporting in terms of section 71 (monthly reporting), section 72 (mid-year report) and section 46 (end-of-year annual reports). This enables the Mayor and Municipal Manager to be pro-active and take remedial steps in the event of poor performance.

The SDBIP provides the top layer of information for the performance agreements of the municipal manager and senior managers, including the outputs and deadlines for which they will be held responsible. The SDBIP aims to ensure that managers are problem-solvers, who routinely look out for unanticipated problems and resolve them as soon as possible. The SDBIP also enables the council to monitor the performance of the municipality against quarterly targets on service delivery.

Essentially the SDBIP will form the basis of the Annual Performance Report and Annual Report. Strides and due consideration has been made in ensuring a service delivery mode that efficiently respond to priorities and demands of our people. Our commitment is to ensure that the public as it were in the formulation stages get involved in reviewing performance of the municipality against set targets, objectives and priorities. The council collective believes that plans will remain plans for as long as a dynamic relationship between the oversight responsibility, administrative efficiency, accountability and public partnership.
